Climate indices Eastern European perspective

Next steps: survey, interviews and the planned content of the final report

Vladimir Djurdjevic

Faculty of Physics, University of Belgrade

May 17, 2021

The IS-ENES3 project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824084

- The online survey will be run in a few days (almost ready)
 - The request for the survey will be sent to all registered participants.
 - 20-25 minutes long
 - Survey will cover
 - Indices definitions*
 - Data sources and calculation practices*
 - Software (calculation and visualization)*
 - Indices application*
 - Gaps, needs, recommendations*
 - One of the ideas of the today meeting was to potentially better shape the questions for the survey.

- June / The online short interviews
 - Interviews will be organized with those who are willing to contribute more to the report than just by completing the survey.
 - We would like to have balanced representation of different climate indices users, applications, climate data and indices providers etc.

- July (first half) / First draft version of the report
 - First draft will be prepared following the findings of the survey and interviews.

- Content
 - *Indices definitions (ETCCDI, ET-SCI, ECA&D, ... or some not covered by the lists)*
 - *Data sources and calculation practices (station data, gridded, models, ... / calculate or calculated)*
 - *Software (calculation and visualization) (offline, online, custom, ... spreadsheets)*
 - *Indices application (operation, research ... area: agriculture, water, ...)*
 - *Gaps, needs, recommendations*

- July (second half) - August / Review
 - Review of the report and potentially additional input from interviewed participants.
- September (mid) / Final workshop
 - To present second draft of the report
 - Invited presentations
